

ATHENA-TEK | CAPABILITY STATEMENT

Network-Focused. Solution-Driven.
Built for Training and Test & Evaluation.

COMPANY OVERVIEW

Athena-Tek delivers advanced communications, Training, and Test & Evaluation (T&E) solutions to the Department of War and mission partners. We bridge resilient multi-modal networks to operational outcomes through one-of-a-kind edge devices and AI-enabled sensor fusion. At the center of our approach is the Training Edge Device (TED), delivering AI to the point of need.

CORE CAPABILITIES

- **Multi-Modal Tactical Networking:** 5G/4G (FR1/CBRS), MANET/Mesh, Wi-Fi, and hybrid backhaul architectures designed for DDIL environments.
- **Training & T&E Edge Devices (TED Ecosystem):** TED, TED-M, and A-TED delivering sensing, computing, multi-network communications, and AI at the edge.
- **AI-Enabled Soldier Safety:** Edge AI, sensor fusion, anomaly detection, adaptive sampling, and performance baselining.
- **Live-Virtual-Constructive (LVC) Integration:** Bridging live instrumentation into virtual and constructive environments while reducing federation risk.
- **Test & Evaluation Network Modernization (TENM):** Expeditionary test networks, wireless modeling, enterprise integration, and instrumentation modernization.
- **Embedded Software, Data Services & AAR:** Edge software, secure data pipelines, visualization tools, and after-action review workflows.

KEY DIFFERENTIATORS

- **Unified Architecture:** Only edge platform combining multi-network communications, sensing, and AI for both Training and T&E.

- **Operational Heritage:** Deep heritage in live-domain execution, not just software or simulation.
 - **DDIL Environment Operations:** Operates in denied, degraded, intermittent, and limited connectivity environments.
 - **Proven Integration:** Proven integration with enterprise training, instrumentation, and test ecosystems.
-

TECHNICAL DEEP DIVE

- **Input & Edge Processing:** Built-in IMU, Barometer, and RTK for sub-meter accuracy in GPS-denied areas.
- **Network Bridge:** Seamless switching between Broadband (5G/SATCOM) and Narrowband (Mesh/MANET) for resilient coverage.
- **AI-Enabled Fusion:** On-board Edge AI (Whisper/ONNX/YOLO) for weapon orientation, behavior analysis, and real-time casualty assessment (RTCA).

PAST PERFORMANCE & OPERATIONAL IMPACT

- **Live Environment Validation:** Successfully executed multiple Soldier Touch Points (STPs), validating TED reliability in contested, complex, and GPS-denied environments.
- **Instrumentation Support:** Proven history of supporting CPE STRI and Army Contracting Command initiatives through prime and sub-prime execution (Contracts: W900KK-20-D-0003, W900KK-20-D-0007).
- **Department of War Initiatives:** Proven track record supporting Department of War initiatives, ensuring interoperability with leading defense primes.
- **Rapid Prototyping:** Agile delivery of prototype solutions for electronic warfare and cyber-electromagnetic activities.

CONTRACT VEHICLES

- **CAGE CODE:** 60JL2
- **DUNS:** 962553744
- **NAICS CODES:** 541330, 541511, 541690, 423690, 541512, 541712, 334111, 334220
- **CONTRACTS:** W900KK-17-C-0017, W900KK-18-D-0031, W900KK-20-D-0003, W900KK-20-D-0007, W15QKN-15-9-1004, GSA IT SCHEDULE 70.
